

*THE WORLD'S FIRST
DIGESTIF GIN CREATED
WITH WHITE TRUFFLES*

Pronounced, earthy nose of forest floor, pine, and mushroom. Complex and multi-layered, it surprises as juniper leaps forward, contrasting with the deep, earthy richness of truffle. It delivers vegetal and decadent notes, with a soft citrus brightness. The finish is long, deep and evolving.

TRUFFLE GIN

A complex and decadent indulgence, created with white truffle from Alba in Piedmont. Each exquisite botanical is distilled individually to preserve the purity of its essence and tailored into a bold, surprising gin where traditional Juniper perfectly complements rich, earthy notes that evoke fresh pine. Enjoy neat as a digestif or over ice and, for the cocktails lovers, as part of a decadent Truffle Negroni.

Distilled by William Lowe, the most innovative producer of alcohol on the planet.
